

Invitation

Training course” EDI for supply chain collaboration in the automotive industry”

Thursday October 3rd, 2019

Näringslivets hus, Storgatan 19 in
Stockholm

Welcome to learn more on EDI for supply chain collaboration in the automotive industry

EDI, Electronic Data Interchange since long has become a tool for the day to day business in the Automotive Industry as well as in many other industries and administrations. As a matter of fact, EDI has been used for more than 30 years now. You could also put it this way: EDI has been in use for so many that many of those who invented or implemented it are no longer with their companies.

This is one of the reasons behind the need for a training course like this one. New people are coming into logistics and IT departments and they are becoming involved in EDI and they need an update on what is it all about. There are also other reasons behind like the need for catching up on future developments in EDI, changes driven either by new business needs or by new technologies and new services.

To this you could also add that EDI clearly is a business-critical activity which of course means that users of EDI are dependent on qualified staff to handle EDI and to run and develop reliable EDI systems.

Odette Sweden has offered basic training for some years now and we are pleased to invite you to our next training course. The training course we are offering has been further developed and as you can see in the agenda the main building block in the training is based on reviewing various business processes aligned to the information exchange structure being used between EDI parties in the automotive industry. Beside the business process aspects, the training course will also focus on the various technologies in use, like Automatic Identification. File Transfer Protocols will be treated in a separate course (the day after).

Our tutors are very experienced in EDI development and implementation and they will deal with topics from the perspectives of large OEMs as well as from an SME point of view.

Target group

The training course will give you a general overview and basic understanding of main components in EDI like messages, syntaxes, Auto Id, Data exchange and the links to business processes and implementation aspects.

We will also perform some appreciated practical tasks in groups during the afternoon.

The expected audience for our training course would include EDI managers, SCM managers, IT-staff and Business unit managers. **Please bring a laptop or similar if possible, for the practical tasks.**

Welcome to an interesting and useful training course!

Michael Bogren, Odette Sweden

Training course content

09.00	Introduction
	EDI – why and what is it? <ul style="list-style-type: none"> • Introduction to Odette • EDI standards and organisations behind • Odette - future development and vision • Example of tools (WebChecker and FAI)
10.00-11.30	General overview of tools used for data exchange (messages, auto-id concepts)
10.00	Messages <ul style="list-style-type: none"> • EDI messages, standards, structure, segments • EDI Components/requirements • Automotive industry compared to Food & Bever
10.30	Coffee Break
10.45	Messages - continues
11.00	AUTO-ID Concepts <ul style="list-style-type: none"> • 1D and 2D symbols • Data Identifiers • AUTO-ID Labels and Barcodes • Equipment for generating and reading labels • RFID – Passive and Active technology • RFID - standards/alternatives
11.30	Business processes and procurement methods in the automotive supply chain <ul style="list-style-type: none"> • Roles of the involved partners • Batch delivery • JIT/JIS process • VMI and CMI processes
12.15	Lunch
13.00	Business processes continues
13.15	EDIFACT Format and syntax, detailed walkthrough Segment architecture
14.00	Implementation issues <ul style="list-style-type: none"> • Driving forces behind EDI • Supplier challenges • IT solutions for EDI and labels • Conclusion
14.30	Coffee break
14.45	Practical tasks
16.30	Summary & discussion
17.00	Wrap up

Date and location

The training course will be held on October 3rd, 2019 at Näringslivets hus, Storgatan 19 in Stockholm, Transportföretagens styrelserum between 09.00-17.00

ODETTE

SWEDEN

Language

The training course will be held in Swedish if there are only Swedish speaking participants, in English if there are non-Swedish speaking attendees. Most of the documentation is available in English.

Course Tutor

Michael Bogren, CEO, Odette Sweden.

Fees

- SEK 6 000 (or 600 €) for the first participant, SEK 1 000 discount for members in NAF/Odette Sweden
- SEK 4 000 (or 400 €) for the second and third participant, SEK 500 discount for members in NAF/Odette Sweden

The fee is including meals and documentation, VAT (25%) is not included in fees above.

Registration

Please register for the training course at

<https://invajo.com/l/ZxKgckuXT3>

Your registration will be confirmed. Your registration is binding, if you would like to cancel your registration earlier than 2 weeks in advance of the training course you will have to pay 40% of the fee, cancelling later means full fee but your seat could be taken over by a colleague of yours. Last registration day will be 1 month before the training day.

If your company **require a PO-number**, it must be filled in together with the invoice-reference in the registration form.

Information

If you have any questions please contact Ingrid Lundberg, +46 703845802 or michael.bogren@odette.se.
