

Invitation to a
Training course on MMOG/LE V4

**Global Materials Management Operations
Guideline / Logistics Evaluation version 4**

Thursday October 18, 2018
Centralhuset Konferens (Central station),
Gothenburg

Welcome to learn about MMOG/LE, version 4

During 2017, Odette International developed a new web and desktop application for MMOG/LE (replacing the excel-version) based on the version 4.1. The tool will be launched in September this year.

MMOG/LE comprises a MP&L audit that is aligned with ISO/TS 16949. The goal of ISO/TS 16949 is the development of a quality management system that provides for continual improvement, emphasizing defect prevention and the reduction of variation and waste in the supply chain. MMOG/LE complements this goal, but with an emphasis on the MP&L management system.

The version 4.1 was published in 2014. The content is the result of a collaborative effort between work groups within Odette International Limited and the US based Automotive Industry Action Group (AIAG) to develop a MP&L evaluation that can be used globally. There are now two variants of assessments: Full (Used by OEMs & Tier 1s) & Basic (Used by Tier 2-N)

MMOG/LE is used by many companies as a tool for evaluating new suppliers. It is also frequently used in existing customer/supplier relations as well as in connection with internal continuous improvements efforts. Among automotive OEM:s and large suppliers with a considerable usage of MMOG/LE one could mention *Volvo Group, Volvo Cars, FORD, PSA Peugeot Citroën, Renault Cars, Chrysler, GM, Robert Bosch, Johnson Controls, Valeo, Continental Automotive, Delphi and ZF*. MMOG/LE is also used in other business sectors.

MMOG/LE is now in use more or less all over the globe, at least where there is automotive industry activity. This is amongst others because MMOG/LE has become an important tool for developing supplier capabilities at "emerging markets".

Training course focus

This training course is focusing on how to use MMOG/LE for self-assessment. Various questions and criteria will be explained and related to each other. From experience we know that sending two persons from the same organization to the training course normally simplifies the internal adoption of MMOG/LE.

Welcome to an interesting training course!

Ingrid Lundberg, Odette Sweden

Training course programme

08.30	Registration and coffee
09.00	<ul style="list-style-type: none"> ○ Introduction of participants and general introduction to the training course ○ Global MMOG/LE background, why use MMOG/LE? ○ Self-Assessment and Audit – how are auditors and self-assessors playing the game?
