Welcome to a cooperation network in the automotive industry

Since many years other automotive countries have cooperation bodies for common development of the automotive industry supply chain, where automotive manufacturers, suppliers, IT companies and logistics companies are involved. On the initiative of Odette Sweden, FKG and BIL Sweden a similar structure has been established in Scandinavia under the name of the *NAF, Network for the development of the supply chain*. The main objective is to contribute to a competitive automotive industry. Welcome - together we are stronger!

NAF is a forum for professional development, improvement, experience and influence in matters having to do with the supply chain function and the relations between the parties in the supply chain. Primarily, it is about logistics, EDI and data communications. Through participation, your company and your employees can access information and knowledge in areas such as:

- Logistics
- Goods marking
- RFID
- Transportation
- Package Management
- Logistics Development Assessment MMOG / LE
- Business systems and quality management
- EDI and IT
- Data Integration issues like OFTP2
- CAD / product data communication

Your company can also propose and participate in various projects and committees on priority topics, where experts from automotive manufacturers, supplier companies, logistics companies and consulting firms are involved. Through a structured cooperative networks there are good opportunities for public funding for various development projects.

NAF / Odette Sweden is included in several international bodies in the automotive industry and works closely with leading experts and decision-makers in the above fields. The NAF / Odette Sweden will open an interface with the international vehicle manufacturers, suppliers and other expertise.

FKG and BIL Sweden are involved directly by affecting the automotive manufacturers, authorities and politicians in the issues raised in the NAF.

NAF is today actively supported by:
