

MMOG/LE - Advanced training

Odette Sweden and Meridion would like to invite to a digital full MMOG training.

New in this training is that we will perform it as a two-day training, where the first day is indeed a full training but also an optional second day, where we focus deeper on criteria and questions. Second day we will be appreciated especially by field auditors.

We have been requested to take out the role play from the trainings, since many people feel uncomfortable with this but will replace this with group work in break-out rooms in Teams (or Zoom)

This session will introduce you to the MMOG/LE tool, its platform (MMOG.NP) and how to use it. During the session we will work in the actual platform and do exercises together in order to understand the structure of MMOG/LE as well as the new platform. Questions that will be answered during the session are for instance what are MMOG/LE, what is the aim with MMOG/LE, how do you use the new platform, how should you read and answer requirements and criteria's etc. We now offer a 10% discount since you have to fix lunch yourself and course is digital.

Training day 1.

Meeting place: Teams/Zoom meeting

Price members: SEK 6.000: - (4.500: - for each following attendant from the same company)

Price nonmembers: SEK 7.000: - (5.500: - for each following attendant from the same company)
