Company presentation

Since 1981 HUENGSBERG has been operating in the information- and communication technology for the automotive industry and has established itself with innovative EDI- solutions. Motivated and driven by the visions of the founder and today's chairman of the Supervisory Board Werner Huengsberg, the company focuses on the engineering-data-exchange. This specialisation brought the market leadership in the CAD/CAM-area for the company.

More than 3000 customers use **DAX**ware worldwide and focus on the innovation-spirit of the company.

HUENGSBERG guarantees "State of the Art" solutions with investment security and an optimal integration into existing structures. The spectrum of our solutions is covering the complete data handling and includes:

- analysis and consulting of customer specific requirements
- solutions for easy and comprehensive data exchange, up to individual communication portals
- integration of applications
- illustration and optimization of complex data exchange processes

Close partnerships with world-wide system integrators secure a qualified on-site service for the customers. Our premise is to offer quality in processes, service and innovation from one source to the customer.
