SMSI (Swedish Multi Sector Invoice) Freight Invoice Profile 2.1 (Based on Global Invoice Message 2.0)

FOREWORD

The global invoice project was started as a joint effort of AIAG, JAMA-JAPIA, and Odette to elaborate a harmonised electronic invoicing message as a common standard for global use in the automotive industry.

Participants in the project team are experts from automotive manufacturers and their suppliers as well as representatives of fiscal authorities, EDI and modelling experts.

Business experts in the project team were interviewed. Based on this information the business process was analysed and UML models of the process and connected activities were created. From these models the necessary data structures were derived.

The EDIFACT - standard was chosen as basis for the final electronic message. Included in the document are a description of the process and its variants, UML-model diagrams and a message implementation guideline for the EDIFACT message.

SMSI (Swedish Multi Sector Invoice)

SMSI has been developed together by three user organisations in Sweden representing automotive, building & construction and transports. The organisations behind are

Odette Sweden
BEAst, Bygg- och Fastighetssektorns Elektroniska Affärsstandard
Sveriges Transportindustriförbund

The idea behind SMSI is to help in harmonising e-invoicing across business sectors like automotive, building & construction and transports. In every company there is more than one kind of purchasing procedure, some procedures are more general and others are more specialised and linked to a specific business situation. SMSI responds to cross-sector common requirements applied in:

- Purchase for manufacturing with the exception of highly specialised logistics flows
- Purchase of non-production items like supply of office products, maintenance products etc
- Purchase of services like transports
- Billing invoices (telecom services, energy supply services, etc)

The SMSI project started as a joint effort to adapt to the new European legislation on invoicing and VAT. The results are common implementation guidelines for SMSI based on the automotive Global Invoice Message 2.0 and these are published in this document.

The present version is the 2nd one of this document. The main changes are the following:

- Currency information is handled in a somewhat different way (as an example some codes in CUX have been changed)
- Some minor errors in the previous version have been corrected
- The VAT exempt codelist has been updated

Complementary information about this specification is available on the following links:

SECTION 1: INTRODUCTION

The SMSI specification is a cross-sector specification that has been developed by automotive, building & construction and transports sector representatives. SMSI builds on a global automotive specification and therefore some of the wordings in this specification refer back to the original document where many references are made to automotive environment. For the sake of clarification these references have been kept in the SMSI specification, as could be seen in Section 1.

1.1 Problem Statement

1.1.1 Business Opportunity

Any industry can reduce its costs by developing a common recommended business practice through the electronic exchange of Invoice Business Information. By being early to market, we hope to have industry participants adopt this practice.

In the process of supply and usage of goods there is one point in time when one party must accept financial liability for the goods that have been either ordered or received or consumed. The process of generating and transmitting the according statement is called the invoicing process and communicates that funds are due for material/services.

1.1.2 Problem Statement

The data model shall contain these core components that are absolutely essential for the purpose described above. In addition, it will contain all data that might be necessary for legal or business reasons in certain regions, countries, or companies.

Although our final deliverable is an EDIFACT message implementation guideline, the technology of describing the process and data also enables any interested organisation or party to derive other compatible EDI-structures, for instance, XML-Schemas.

1.1.3. Scope

The project describes the invoicing process and its variants. It considers the legal statement and, to a certain extent, arguments or corrections of an invoice. It does not explain thoroughly the process that leads to a business relationship between the parties and the actual supply.

In detail the following functions will be in the scope of the INVOIC business domain:

- Traditional, supplier initiated invoice
- Self-billing invoice

The following tasks will **not** be in the scope of the INVOIC business domain:

- Reconciliation of an inaccurate invoice (commercial dispute)
- European and North American payment/remittance procedures

Compared with Global Invoice version 1, the following major changes / extensions apply:

- Additional information according to the Sixth European Union directive regarding tax exemption and special procedures.
- Several references to other business documents have been added on header and item level to enhance the business process traceability.
- The Tax Representative Party has been added.

1.1.4. References

- UN/EDIFACT INVOIC Message (D03A)
- UN/CEFACT's TMWG N090 Unified Modelling Methodology

1.2 Introduction to the Modelling Approach

This specification is based on a modelling approach. However in this version the model is not presented due to formal reasons. There are still some Change Requests on the Global Invoice V2 message that have not yet been formally approved. Chapter 2 and 3 are therefore excluded in this version of the document and will be published later.

In a continuous effort to attain global EDI harmonisation using UN/EDIFACT messages, this document is based on UN/CEFACT N090 Unified Modelling Methodology. The N090 guideline provides a process for message development with the facilitation of UML.

The initial step is to create Business Domain Use Case Diagrams.

From these diagrams, Use Case Descriptions are constructed that lead to the Activity Diagram. Once these works are complete, with the means of data –modelling, the data structure for generating user documentation and technical specifications is created. This data model can be translated into UN/EDIFACT syntax, XML, and future data exchange formats.

The project also used the Business Process Worksheet templates recommended by UN/CEFACT's BPMWG.

1.3 Stake holder's Needs

Customer Expectations

- Trading partner agreements must be established. This includes the transport protocol that is vital in understanding the wrappers/enveloping, response requirements, syntax, and message format.
- Accept liability only for material /service provided according to orders sent and prices agreed upon.
- Generation of a business document that fulfils all legal and tax requirements
- Reliable flow of business instructions, material and/or services as necessary for the ongoing production process.

Supplier Expectations

- Trading partner agreements must be established. This includes the transport protocol, which is vital in understanding the wrappers/enveloping, response requirements, syntax of the message, and message format.
- Being accurately paid for material and service.
- Generation of a document that fulfils all legal and tax requirements.
- Reliable flow of business instructions in order to enable the sales and delivery of material and/or services on an established contractual base. This information must also conform to legal requirements in order to enable the invoicing process and financial claims.

Stakeholders Outside of the Business Domain

Anyone not involved in the financial reconciliation process is outside this domain, such as engineering and manufacturing related personnel.

Freight Invoice Profile 2.1 (Based on Global Invoice Message 2.0)

SECTION 2: BUSINESS PROCESS MODEL

2.1 Business Domain

Process Business	Marketing	Ordering	Distribution	Settlement	Regulatory
Manufacturing					
Financial					
Retail					
Transport				Invoicing	Invoicing
Services					

Table 1: Business Domain Matrix

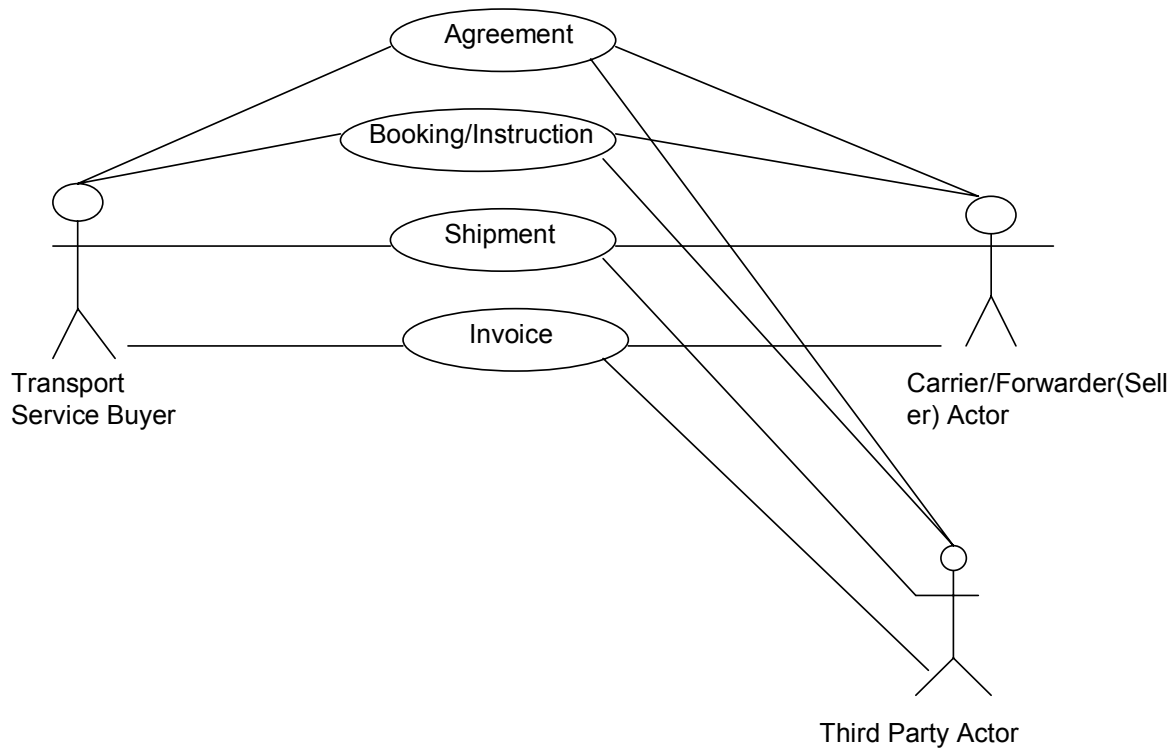

The Freight Invoicing business process as described in this documentation is considered mainly as part of the Transport business and belongs to the settlement and regulatory (for taxation) processes.

Form: ebXML Business Process WS::BPS1 - Business Domain Worksheet	
1. Invoicing Domain	
Name	Provide a name for the reference model. You can use an existing reference model such as the Supply Chain Council or the Porter's Value Chain or create your own name. Invoicing
Description	A brief summary of this domain. Business domain of an enterprise that is responsible for the calculation, storage, and communication of liabilities or claims due to transport services delivered or received.
Industry Segment	Provide the name of the industry segment that this business applies to. Search the business process library for a list of possible industry segments. If the industry segment does not exist, then provide an appropriate name/label for the industry segment. Multi sectors (Automotive – Building & construction – Transport –Supply chain)
Business Areas	List the business areas within the scope. A business area is a collection of process areas. A process area is a collection of business processes. You may wish to refer to the ebXML Catalog of Business Processes that provides a list of normative categories that may be used as business areas. Accounting
Business Justification	Provide the business justification for the collection of business processes Accounting data have to be updated (creditors and debtors ledger), taxation requirements and forecast of cash flow.
Category Schema	Provide the name of the categorization schema used to reference use cases.
Stakeholders	Identify the practitioners that care about the definition of this business domain. At this level, this is likely to be some participants in an industry group (perhaps a standards body or an enterprise). These are the people who will define the BRV.] Odette – Transportindustriförbundet (Swedish International Freight Association) – BEAst (The e-Business Association in Sweden for building & construction) European taxation authorities (represented by HMCE)

Table 2: Business Domain Worksheet

SMSI (Swedish Multi Sector Invoice)
Freight Invoice Profile 2.1 (Based on Global Invoice Message 2.0)

Use Case Diagram: General View on Business Process

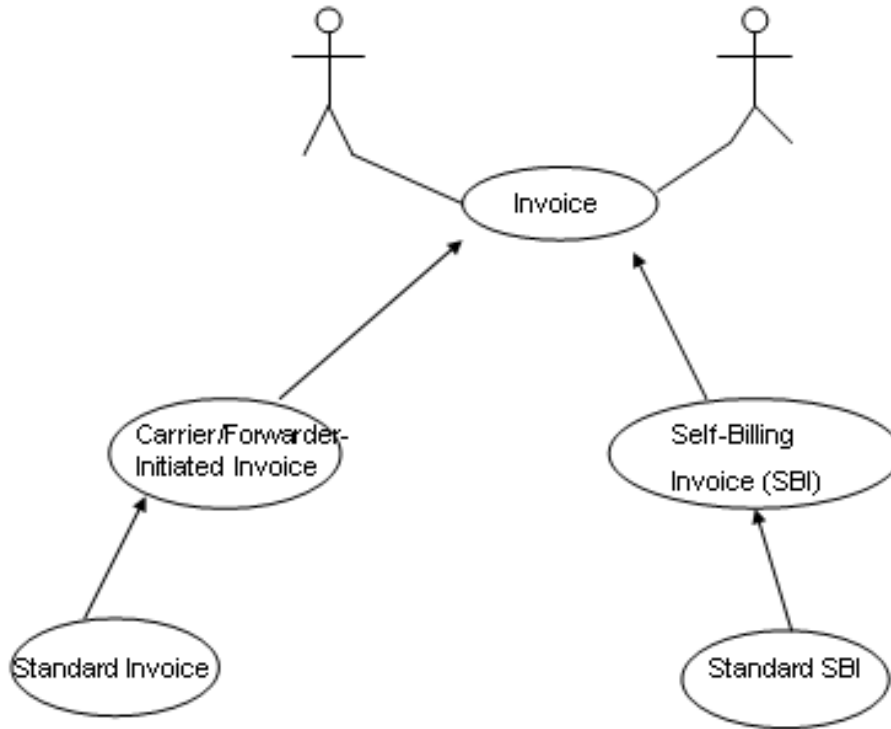

A Booking/Instruction business process includes generally

- a Booking/Instruction process (establishment of business relationship and exchange of shipment data)
- a shipment process (ordered shipment are physically brought to the Buyer)
- an invoice process (based on confirmed shipment data, the Buyer becomes liable for payment)

At least a buyer and supplier are included in the business process. One more third parties may be involved

2.2 Invoice Business Process

Form: ebXML Business Process WS::BPS2 - Business Process Worksheet	
2. Invoice Business Process	
Name	Provide a name for the business process. This should be a name identified on the form "Identify Business Process" and on a "Describe Process Area" form. Invoice BP
Description	[A plain text explanation of the purpose and behaviour of the Business Process] The invoice issuer generates a detailed statement of trade accounts payable (invoice message) based on existing contracts and/ or actually supplied services. The invoice recipient reconciles the statement of trade with the appropriate agreed pricing model, quantities and services, updates his own accounting system and finally makes payment remittance based on the same.
Definition	A set of simple sentences that state the actions performed as part of the business process.
Business Requirements	The list of business requirements that apply to this business process. The format of requirement definition is covered (as shown in Annex 4, Business process Specification Template, in the UMM). Economic event: goods or services have been provided / received in accordance with economic commitments (contracts). Economic resources: Goods- and passenger transport services Partner: Carrier/Forwarder, Transport Services Buyer
Participants	List the type of partners involved in the business process. E.g. manufacturer, supplier, customer Carrier/Forwarder(Seller) roles =====
	- Carrier/Forwarder: The party providing Transport services. - Payee: Recipient of the funds. (e.g. payment) - Ship-From: Identification of the party from where goods will be or have been shipped.
	Transport Services Buyer roles =====
	- Transport Services Buyer: Party mentioned in the transport document, which by contract with a carrier sends goods with that carrier. (also known as Consignor/ Ship from) - Ship-to/Consignee: Party mentioned in the transport contract by which goods are to be received. - Invoicee: Party to whom an invoice is issued - Delivery Party: Party to which goods are being delivered, if not identical with Ship-to.
	Intermediary (Third party) =====
	A commercial party who provides services to customers, suppliers, or authorities within the international supply chain: - Financial institution - Agent: Party authorised to act on behalf of another party - Broker or Sales office: Party acting in the name of the Seller or as a broker or as sales office.
Preconditions	Preconditions are the rules for defining the conditions that must be true for the context that this process is conducted within. These rules are constraints that must be satisfied before instantiating or initializing the business process thus ensuring that the proper

SMSI (Swedish Multi Sector Invoice) Freight Invoice Profile 2.1 (Based on Global Invoice Message 2.0)

	context for the process has been established. A contract framework is established. Specification of transport and services are agreed upon.
Begins When	Identifies the event(s) from that start this business process. The Transport Services Buyer places a Transport Booking/Instruction (sends it to the Carrier/Forwarder(Seller)).
Ends When	List all the event(s) that causes normal completion of the business process. The invoice is submitted and there are no arguments (commercial dispute).
Exceptions	List all exception conditions (events) that will cause the business process to terminate before its normal completion.
Post-conditions	Post-conditions are the rules for defining the conditions that must be true for the localized context that exists after the business process completes. These rules are constraints that must be satisfied after the business process thus ensuring that the proper update to context of the parent process has been occurred. Payment
Supporting BC and BP	List the business collaborations and business processes that support (are part of) this business process. Carrier/Forwarder initiated Invoice -Standard commercial invoice -Self billed invoice (SBI)

Table 3:

SMSI (Swedish Multi Sector Invoice)
Freight Invoice Profile 2.1 (Based on Global Invoice Message 2.0)

2.2.1 Business Process: Carrier-Initiated Invoice

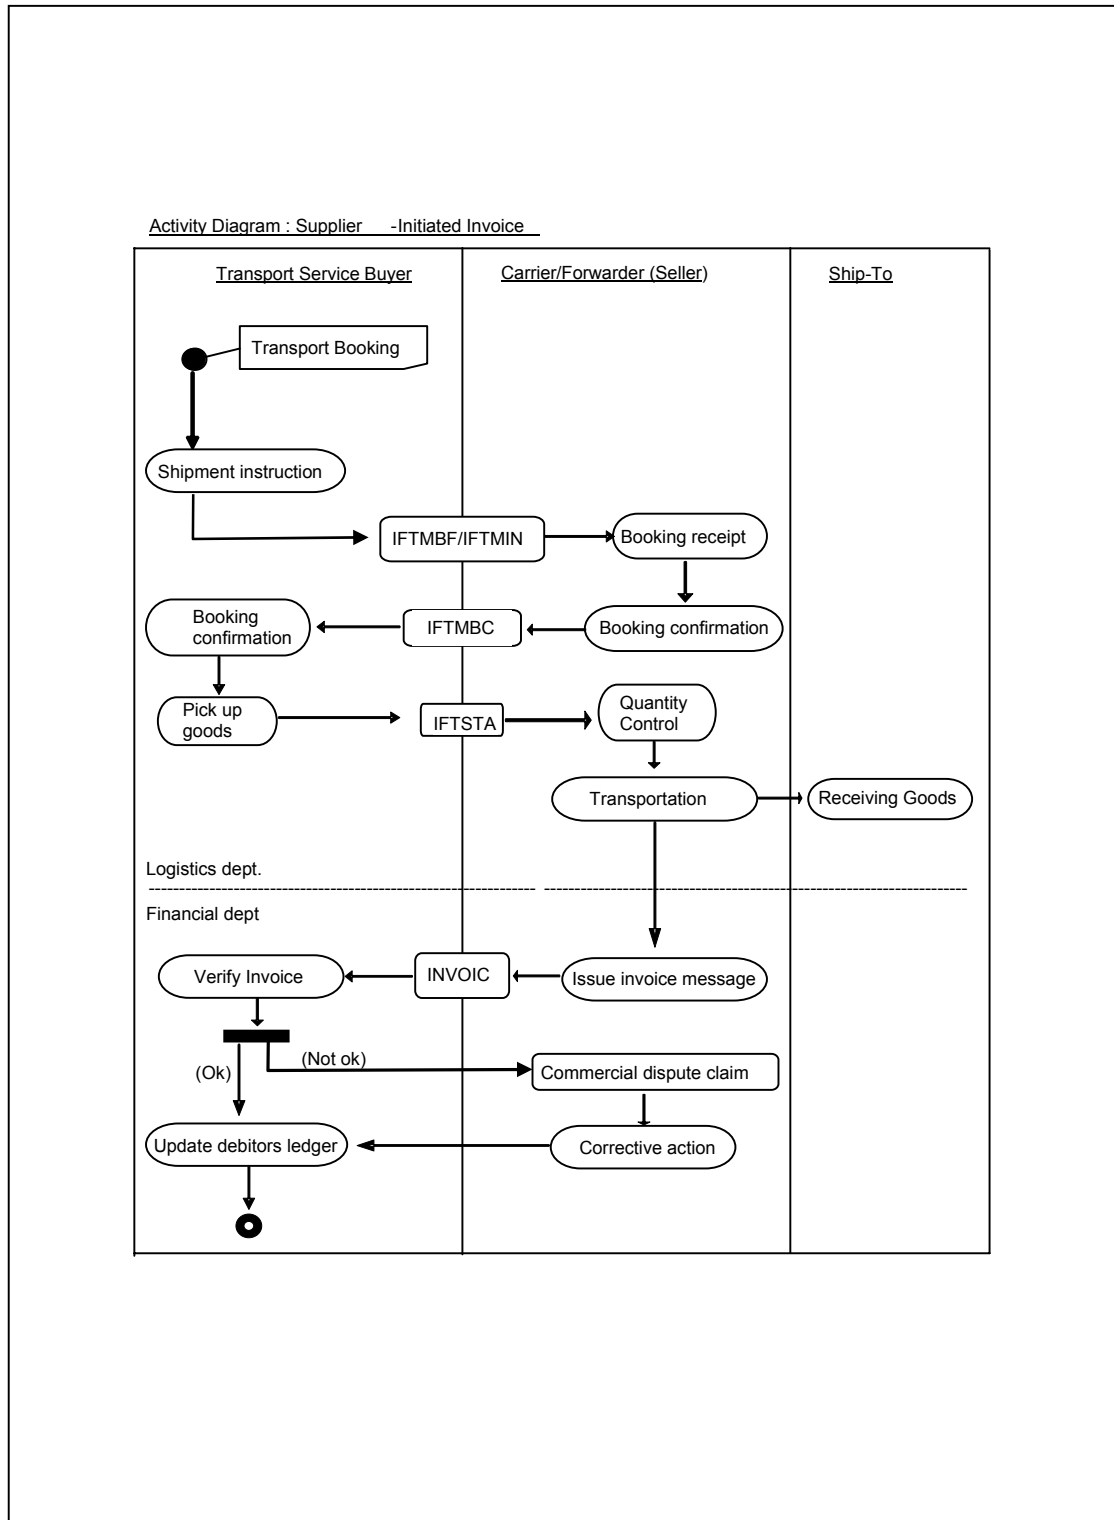

Form:	ebXML Business Process WS::BPS3 - Business Collaboration Specification
3. Carrier/Forwarder Initiated Invoice (1)	
Collaboration Specification Name	Provide a name for the Business Collaboration Carrier/Forwarder-Initiated Invoice
Collaboration Specification Type	[Choice between Business Collaboration, Business Collaboration Protocol or Business Transaction Specification Business Transaction Specification
Description	A plain text explanation of the purpose and behaviour of the Business Collaboration Carrier/Forwarder presents to Transport Services Buyer a detailed statement of trade account payable (invoice message). The Transport Services Buyer reconciles the statement of trade with the appropriate agreed pricing model and makes payment remittance based on the same.
Definition	A set of simple sentences that state the actions performed as part of the business process. Transport booking/instruction based on planned Despatch. Based on the agreed contract and demand instructions, Transport Services Buyer sends a transport booking to the carrier. Carrier/Forwarder sends a booking confirmation back to the Transport Services Buyer. Carrier/Forwarder picks up the goods. In some cases a proof of collect could be sent. (Status message). When Carrier/Forwarder delivers goods at final destination a proof of delivery could be sent to the Transport Services Buyer. (Status message) Transport Services Buyer verifies receipt of the Service. Issue Invoice For each conveyance to a unique destination, a unique identification number is assigned (e.g., shipment, proof of delivery). An invoice is generated to correspond to that unique identification number. The invoice should be Issued by the Carrier/Forwarder to the Transport Services Buyer. Reconciliation with Transport services Ship-to performs reconciliation of shipment for that unique identification number. Discrepancies are noted and the Carrier/Forwarder is advised. Transport Services Buyer and Carrier/Forwarder agree on adjustments of invoice amount based on contract terms. Update the creditor's ledger.
Participants	List the type of partners involved in the business process. E.g. manufacturer, supplier, customer Transport Services Buyer, Carrier/Forwarder(Seller) Ship-to (consignee), Ship-from (consignor)
Preconditions	Preconditions are the rules for defining the conditions that must be true for the context that this process is conducted within. These rules are constraints that must be satisfied before instantiating or initializing the business process thus ensuring that the proper context for the

2.2.2 Business Process: Supplier-Initiated Invoice

SECTION 4: UN/EDIFACT MESSAGE IMPLEMENTATION GUIDELINE

The message implementation guideline describes how the semantic content is being applied to the D.03A UN/EDIFACT standard message INVOIC.

It contains four different reports:

- A structure / table of contents report, which gives an overview of the segments and segment groups used in the message and their semantic usage.
- A branching diagram, which displays the structure in a different view.
- A segment details report, which explains the used segments in detail.
- A code lists report, which lists for each coded data element the applicable codes within the framework of this implementation guideline.

The original status information assigned by the UN/EDIFACT standard is expressed as follows:

UN/EDIFACT	Implementation
Status M	M - mandatory within the scope of next higher hierarchy level (composite data element, segment, segment group, or message) N - not used (applies only to component data elements), due to be subordinate to a not-used composite data element this component data element is not used
Status C	R - required within the scope of next higher hierarchy level (composite data element, segment, segment group, or message) O - optional within the scope of next higher hierarchy level (composite data element, segment, segment group, or message) D - depending; rules are described in the comment N - not used

5402	Currency exchange rate	C n..12	R n..12	Currency Conversion Rate
6341	Exchange rate currency market identifier	C an..3	N	not used

Comment:

One segment group is always required depending on business case.

SG7 First occurrence:

In some countries it is a requirement that , for invoicing in foreign currency, the invoice taxable and tax (e.g VAT) amounts must also be expressed in home currency.

Relating this to the CUX segment, authorities would require the invoicing currency and home currency to be shown together with the rate of exchange(element 5402) used.

Some companies require the currency of the invoice to be present, If, then, only one currency applies to the invoice it may expressed as CUX+2:SEK:4+3:SEK:4:1' .

Calculation rule: Reference Currency multiplied by rate = Target Currency

If more currencies have to be transmitted, another SG7 - CUX, DTM has to be created and rules for that are described in next CUX segment

Example:

CUX+2:EUR:4+3:SEK:11+9.987'

5402	Currency exchange rate	C n..12	R n..12	Currency Conversion Rate
6341	Exchange rate currency market identifier	C an..3	N	not used

Comment:

SG7 Second occurrence is to be used depending on business case. Home currency:
in some countries it is a requirement that, for invoicing in foreign currency, the invoice taxable and tax (e.g. VAT) amounts must also be expressed in home currency. Relating this to
the CUX segment, authorities would require the invoicing currency and the home currency to be shown together with the rate of exchange (element 5402) used. Calculation rule:
Reference Currency multiplied by rate = Target Currency.
This segment is used for conversion of cost in other currencies into invoicing currency.

Example:

CUX+2:EUR:10+3:SEK:4+0.11'

UN/EDIFACT Message: Segment details

Group: **SG50** Status: O Max. Occ.: 1 Total invoice price adjustment amount in invoicing or payment currency

Segment: **MOA** Seq. No.: 83 Level: 1 **Monetary amount**
Status: M Max. Occ.: 1
Counter: 2210

Name: Total invoice price adjustment amount in invoicing or payment currency

Description of segment:

UN/EDIFACT			Implementation	
	Name	St Format	St Format	Use / Comments
MOA				
C516	Monetary amount	M	M	
5025	Monetary amount type code qualifier	M an..3	M an..3	Amount Type 165 = Adjustment amount
5004	Monetary amount	C n..35	R n..15	Minus sign or DE 4405 must be used to indicate negative figures.
6345	Currency identification code	C an..3	R an..3	Invoicing or Payment currency, coded according to ISO 4217 three alpha code.
6343	Currency type code qualifier	C an..3	O an..3	Amount Currency Qualifier 4 = Invoicing currency 11 = Payment currency Note that 4 = Invoicing currency and 11 = payment currency are to be understood as synonymous)
4405	Status description code	C an..3	N	not used

Comment:

In some countries the invoice amount is always rounded to full currency units (e.g. SEK in Sweden). The sum of all line item amounts + or - allowances, charges, taxes does often not equals to this rounded invoice amount. In this case, an adjustment amount might be necessary to explain the difference.

	Name	St Format	St Format	Use / Comments
				AAB = Exempt - Article 16 of Directive 77/388/EC AAE = Exempt - Article 28b(C) AAL = Reverse Charge - 2nd subparagraph of Article 16(1) of Directive 77/388/EC E = Exempt from tax S = Standard rate Z = Zero rated goods
3446	Party tax identifier	C an..20	N	not used
1227	Calculation sequence code	C an..3	N	not used

Comment:

When sending a message with data element 5278 in the TAX segment, the tax rate (numeric) should be presented in an alpha-numeric field as follows: 19.5% ==> :19.5

In European business environment, it is recommended to use SG52 as well to summarize line items belonging to the same exemption category. Assuming an invoice with a mixture of line items (1000 EUR) subject to VAT and line items (1000 EUR) subject to tax exemption, the following example would explain the recommendation:

SG50: Total invoice amount (MOA+77) 2160.00 EUR

SG50: Total taxable amount (MOA+125) 1000.00 EUR

SG50: Total tax amount (MOA+176) 160.00 EUR

SG50: Total exemption amt (MOA+403) 1000.00 EUR

SG52: Tax rate and amounts - VAT

SG52: Tax rate and type (TAX+7) 16% VAT

SG52: Taxable amount (MOA+125) 1000.00 EUR

SG52: Tax amount (MOA+124) 160.00 EUR

SG52: Tax rate and amounts - exempt code AAA

SG52: Tax rate and type (TAX+7) 0% AAA (exempt ...)

SG52: Taxable amount (MOA+125) 1000.00 EUR

SG52: Tax amount (MOA+124) 0.00 EUR

5.1 Invoice Profile

5.1.1 This message covers the invoicing function using one of the following processes.

- Classic invoicing: The message is sent by the seller to the buyer claiming payment for goods despatched under mutually agreed conditions.
- Self-billing: The message is sent by the buyer to the seller to settle payment for goods despatched under mutually agreed conditions. The buyer will arrange for payment according to agreed conditions. Not described in this chapter

One invoice must refer to one order from the buyer and one or more transport event.

An invoice may refer to **(R = Required for business needs or VAT legislations)**:

- Buyer in following roles **(R)**
 - One buyer
 - One buyer as officially registered (if required in legislation)
- Seller in following roles **(R)**
 - One seller
 - One seller as officially registered
- Other parties
 - One pay-to
 - Invoicee
 - Invoice issuer
- Payment means
- One payment condition
- Terms of delivery
- Currency information: the pricing currency of the invoice, a different payment currency if agreed between the parties, and a specific VAT amount currency (home currency) when different from the pricing currency or payment currency **(R)**
- General information
- One set of legal and fiscal information
- Allowance and charges
- Different transport services **(R)**
- Dimensions, quantities, prices, different dates, different sums and amounts at line level **(R)**
- One or more allowances/charges at article line level agreed between Buyer and Seller
- Free text information
- References
- Package information
- Locations
- Other parties (ship from, ship to, carrier, agent, debiting office, delivery party)
- Transport details
- Article or allowance/charge (Used upon agreement) related to more than one VAT category and rate.

UN/EDIFACT Message: Segment details

- An invoice may contain adjustments related to prices/amounts to avoid differences caused by fractions (e.g., used in Sweden)
- VAT exempt for crossborder between different EU countries.

UN/EDIFACT Message: Segment details

5.1.2 Invoicing EU Directive 77/388/EC

Since 20040101 a new Invoicing directive was implemented in EU. Required information in this directive was defined and has to be used in all EU countries. This information has been stated in the specifications as Required in EU. Other countries outside EU should also send this information to harmonise the specification.

In order to simplify the use of Tax Exemption Reason, a codelist have been created for this purpose. It should be used cross-border between different EU countries.

<p>AAA Exempt – Article 146, 148 and 151 of Council Directive 2006/112//EC Exemption of exports from the Community and like transactions and international transport. To be used when invoicing goods which are delivered to a non-EC country and when invoicing certain services, where these are directly connected with the export of goods.</p>
<p>AAB Exempt – Article 164 of Council Directive 2006/112//EC Special exemptions linked to international goods traffic. To be used when invoicing goods which are imported from a non EC country into an approved warehouse, or free zone, within the EC area, and held in warehouse under VAT suspension. This arrangement may also include VAT suspended goods movements between different approved warehouses within the EC provided that the goods are re-exported from the warehouse to a non-EC country. Should also be used for transport costs included in customs value. <i>Example: a company in EC country A imports goods from US and stores them in an approved warehouse, under VAT suspension. The EC company A then sells the goods to a company in EC country B and transfer the goods from the warehouse in country A to a warehouse in country B, still under VAT suspension. Then the company in country B sells and delivers the goods to a company in Russia.</i></p>
<p>AAC Exempt – Article 138 of Council Directive 2006/112//EC Exempt Intra-Community supplies of goods. To be used when invoicing goods which are delivered from one EC country to another EC country if the customer has a VAT number in another EC country. The goods have to be dispatched or transported by or on behalf of the vendor or the person acquiring the goods.</p>
<p>AAE Reverse Charge — Article 48, 49 and 50 of Council Directive 2006/112//EC Reverse Charge Intra-Community transport services. To be used when invoicing the transport of goods within the EC and ancillary services to these transports, services rendered by intermediaries, services on movable tangible property, where the customer is registered for VAT in a different EC country to that of the supplier.</p>
<p>AAF Exempt – Article 346 of Council Directive 2006/112//EC Exemption under the special scheme for investment gold. To be used when invoicing investment gold to a customer in another EC country, where the special scheme for investment gold is applicable.</p>
<p>AAG Exempt – Article 131, 132 and 135 of Council Directive 2006/112//EC Exempt within the territory of the country. To be used when invoicing, within the supplier's own country, goods and services that are</p>

Freight Invoice Profile 2.1 (Based on Global Invoice Message 2.0)

UN/EDIFACT Message: Segment details

<p>exempt from VAT under the national legislation – e.g. banking-, insurance services, hospital care, medicine and education.</p>
<p>AAH Margin Scheme – Title X11, Chapter 4 of Council Directive 2006/112//EC Special arrangements applicable to second-hand goods, works of art, collectors items and antiques. To be used when invoicing second-hand goods, works of arts, collector’s items and antiques where the margin scheme is applicable.</p>
<p>AAI Margin Scheme – Title X11, Chapter 3 of Council Directive 2006/112//EC Margin scheme for travel agents To be used when invoicing for travel arrangements where the margin scheme for travel agents is applicable.</p>
<p>AAJ Reverse Charge – Article 198 of Council Directive 2006/112//EC Reverse charge procedure applying to supplies of gold. To be used when the supplier of the investment gold, which would otherwise be exempt from VAT, has exercised the right to “option to tax”, under the Article 26b(C) of directive 77/388/EC. Under this “option to tax” arrangement, the customer is liable to account for VAT on supply, under the reverse charge procedure.</p>
<p>AAK Reverse Charge – Article 194 of Council Directive 2006/112//EC Reverse charge procedure. Special scheme for non VAT registered companies within an EC country in case of domestic supply of goods and services to a VAT registered purchaser in that EC country. To be used when invoicing goods and certain services, from a supplier (a foreign entity) who is not established and registered for VAT in an EC country, to a customer who is VAT registered in that EC country.</p>
<p>AAL Reverse Charge Exempt - Article 164 of Council Directive 2006/112//EC Reverse charge procedure when goods cease to be covered by warehousing arrangements. To be used when invoicing goods from a non-EC country which have been held in an approved warehouse and should be removed for consumption in an EC country (i.e. not re-exported as in AAB). <i>Example: still using the example above (AAB) as a base the company in country A sells and transfers the goods to a company in country B but in this case the company in country B sells and deliver the goods to EC country C for domestic consumption.</i></p>
<p>AAM Exempt New Means of Transport – Article 2, 3 and 4 of Council Directive 2006/112//EC Intra-Community supply of a new means of transport. To be used when invoicing a supply of new means of transport to a customer in another EC country.</p>
<p>AAN Exempt Triangulation – Article 141 of Council Directive 2006/112//EC Triangulation To be used when invoicing by a company who is the middleman in a triangulation chain i.e. goods trade between three parties in different EC countries and the goods delivered from the first part to the last part.</p>
<p>AAO Reverse Charge – Article 196 of Council Directive 2006/112//EC Reverse charge procedure for services such as consultant, lawyer, information, ADB and translation. To be used when invoicing taxable services for example consultant-, lawyer-, auditor-,</p>

translation- and information services, ADB and preparing systems and programs, advertising to EC countries and certain non EC countries.

AAP VAT exempt/reverse charge, within the construction business, Article 199 1 a-b of Council Directive 2006/112//EC

Reverse charge Supply of certain services within the construction businesses should be taxable by the purchaser instead of the seller.

The services should concern property, building or other establishment. The services mentioned are land- and ground work, construction work, installations, construction finalize work, letting of construction machinery with driver, construction cleaning and letting of labour for these services. The purchaser should be a business which supplies the same services.
