Data Interchange is a leading provider of B2B and EDI solutions, supporting thousands of customers worldwide for the past 25 years. Our solutions enable companies to trade electronically in a variety of market sectors including retail, finance, logistics, supply chain and automotive. Through seamless integration with ERP systems including SAP, Oracle and Navision, we provide an end to end solution to support any supply chain requirement and shared business processes.

Our solutions enable organisations of all sizes to benefit from B2B. Our customers include major Retail, Finance and Automotive companies who use our software for their own B2B requirements. We pride ourselves in having customers who strongly recommend Data Interchange to their trading partners as their preferred B2B provider.

Data Interchange Managed Services provides a fully managed B2B capability enabling companies of all sizes to benefit from electronic trading. This ensures our customers can concentrate on their core business while benefiting from business process efficiencies and cost savings. Data Interchange Managed Services are scalable and offer our customers the following capabilities:

- Security & Compliance
- Global Messaging & Connectivity
- Universal Mapping & Translation
- Activity Monitoring & Reporting
- Data Validation
- Project Management
- Implementation Services

Data Interchange provides solutions worldwide and has offices in the UK, Spain, Germany and Sweden. In addition our distributor network spans Europe, USA, Africa and the Far East.
